

The first family of markers and delineators made from post-consumer recycled plastic, Carsonite's GreenLine products offer high durability and impact resistance, plus multiple profile choices in a variety of brilliant colors. All GreenLine markers and delineators feature flexible, polymer construction, with UV stabilizers and color-fast pigments for years of reliable service. They've met or surpassed the performance standards for certification by a long list of local, state, and national agencies.

**SINGLE CURVE MARKER / DELINEATOR**

This highly flexible post features a simple curved design that bends easily upon impact and returns to its original upright position. Decals or reflective sheeting can be applied to both sides. Easily withstands direct tire impacts and vehicle impacts at highway speeds. Installs easily in all types of soils with optional U-channel anchor. Standard post height is 48" above ground.

**DOUBLE CURVE DELINEATOR**

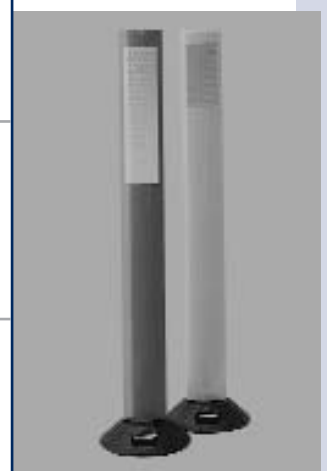

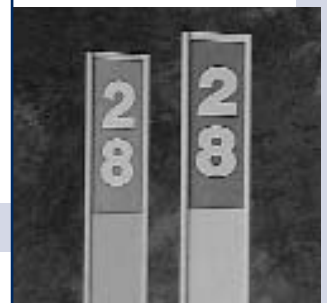

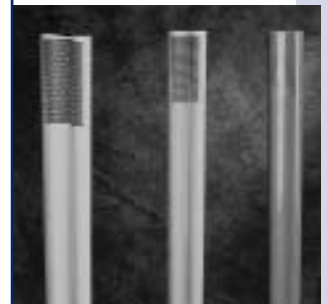

Flexible yet wind resistant, the GreenLine Double Curve Delineator provides multiple reflective angles for enhanced visibility, and easily withstands multiple tire and vehicle impacts at highway speeds. Add reflective sheeting for nighttime visibility. Installs easily in all types of soils with optional U-channel anchor. Standard post height is 48" above ground.

**GENERAL PURPOSE MARKER**

A simple, flat marking post designed for economically identifying utility locations, supporting rural "9-1-1" programs, and performing many other useful functions.

**SURFACE MOUNT DELINEATOR**

GreenLine Surface Mount Delineators are ideal for temporary or permanent roadway delineation and identification-marking on hard surfaces. They withstand vehicle impacts and install easily with epoxy or mastic pad. A quick-release pin system makes post replacement fast and simple. Add reflective sheeting or message decals to suit the application.
