

# Driveable Flexible DELINEATORS

The Carsonite Roadmarker and Curv-Flex have become industry standards as permanent, flexible roadside delineators with an unparalleled service cycle.

## ROADMARKER®

*Withstands High Speed Vehicle Impacts*

For use on straight-aways and general delineation, Carsonite's Roadmarker will withstand numerous vehicle impacts at various speeds and return to its original upright position.

The unique "three-rail" design provides the optimum combination of flexibility and structural integrity for easy installation. The recessed surface protects sheeting from damage during vehicle impacts.

A special introductory kit is available.

## CURV-FLEX®

*Passed NASHTO and SASHTO Vehicle Impact Testing*

Ideal for on/off ramps, curves and other high impact areas, Carsonite's Curv-Flex is designed for greater flexibility, enabling direct tire and high speed vehicle impacts.

Because of its greater flexibility, the Curv-Flex may require a small pilot hole in dense soil conditions before installation with Carsonite's PDR-1 Driver.

A special introductory kit is available.
